Seamless Integration:

The 7 Point Event Display allows you to deliver a daily listing of events from your scheduling system straight to a digital monitor for staff and customers.

Highly Configurable:

Our displays can be customized with your logo and branding and are automatically updated throughout the day as events change.

Our displays are perfect if you have multiple departments or buildings. You can target specific events to specific monitors.

Installation Prerequisites:

Our web based event display is a .Net web application that can be installed to any existing web server deployed on Microsoft Windows® server technology. The web based event display is compatible with any modern browser.

Our Microsoft PowerPoint® based version can be utilized on any machine running PowerPoint 2010 or newer with a network connection to your scheduling software database or access to a vendor supplied API.
